CATALOGUE ESSAY

This magnificent emerald and diamond watch featuring a fan silhouette set with artfully arranged oval emeralds, comprises a remarkable 42.32 carats of vibrant emeralds and the finest white diamonds. Born from an intricate collaboration between Graff's head of technology and GLW, to ensure that the mechanisms that reveal the dial were effortless and imperceptible, the stones move fluidly and elegantly to reveal a baguette-set diamond dial. Set with minimal visible metal, each stone has been meticulously selected and considered to ensure the deft movement of the piece and maximum scintillation.
