

# Armin Strom, System 78, Tribute 1 First Edition For Sale

13,900 €

## TECHNICAL SPECIFICATIONS

Manufacturer	Armin Strom
Collection	System 78
Model	Tribute 1
Name	First Edition
Registration Year	
Movement	Manual-Winding
Limited Edition	One of Only 25 Unit Produced
Case	Stainless Steel
Bracelet	Calf Leather
Clasp	Stainless Steel

## GENERAL CHARACTERISTICS

Manufacturer - Armin Strom  
Collection - System 78  
Model - Tribute 1  
Name - First Edition  
Year -  
Reference -  
Gender - Men's Watch / Unisex  
Shape -  
Style - Haute Horlogerie

## CALIBRE

Movement - Manual Wound  
Calibre - AMW21  
Power Reserve - 100 Hours  
Frequency - 25,200 vph (3,5 Hz)  
Jewels - 21  
Individual Parts - 135

## CASE

Diameter (w) - 38 mm  
Material - Stainless Steel  
Bezel - Stainless Steel  
Winding Crown - Stainless Steel  
Water Resistance - 5 ATM / 50 M / 5 BAR  
Crystal - Scratch Resistant Sapphire  
Back : See-Through Sapphire Crystal

## DIAL

Dial Material - Offset Gold  
Dial Colour - Black  
Dial Numerals -  
Hands - Stainless Steel

## BRACELET / STRAP

Bracelet Material - Calf Leather  
Bracelet Color - Grey  
Clasp - Folding Clasp  
Clasp Material - Stainless Steel

## COMPLICATIONS

- Hour
- Minute
- Seconds
- 

## OTHERS

- Motor-Barrel
- 10 Years Warranty
- Solid White Gold Bridge On The Dial Side

## CATALOGUE ESSAY

Today's Armin Strom is heir to a long tradition of manually-wound dress watch production. The Tribute 1 revisits that history with a watch characterized by its modern aesthetics, classic proportions, technical distinction and exceptional hand-finishing. The Tribute 1 is offered in a classically-proportioned case measuring 38mm in diameter, with a height of just 9mm. The crown of the manual wound calibre is located at 2 o'clock, enhancing comfort while conveying an avant-garde sensibility. The lugs are intentionally slender, enhancing the elegant appearance of the timepiece. The distinctive dial of the Tribute 1 seems to magically transition between shades of grey in variable lighting conditions, with a particular affinity for natural light. The plate positioned adjacent to the off-center dial, is embellished with a spectacular grenage finish that adds texture to the dial. The hand polishing of the solid white gold barrel bridge, positioned to the front of the watch, requires an average of 12 hours to complete. The barrel, visible on the dial-side of the timepiece, is similarly meticulously hand-polished. The meticulous polishing of the hands, which were designed specifically for the Tribute 1, are also extremely time-consuming to produce. The gear train bridge on the backside is beveled and polished in 60° – a process that's far more complex to execute than the standard approach; requiring twice as long to complete.
