CATALOGUE ESSAY

Perpetual Moon is the quintessence of refinement, with its rich textural variation and the generous 29 mm diameter aperture looming over the dial that houses the shimmering 18-carat gold engraved moon floating in a blue guilloché night starry sky.

This movement supply a precision moon phase with one day deviation every 122 years and offers a unique easy-to-set feature with the addition of a second moon phases indicator visible through the transparent case back.
