

Arnold & Son Time Pyramid Black For Sale

19,795 €

TECHNICAL SPECIFICATIONS

Manufacturer	Arnold & Son
Collection	Time Pyramid
Model	Black
Name	1TPAS.S01A.C124B
Registration Year	
Movement	Manual Winding
Limited Edition	One of Only Few Unit Produced
Case	Black Dlc Coated Stainless Steel
Bracelet	Alligator Leather
Clasp	Black Dlc Coated Stainless Steel

GENERAL CHARACTERISTICS

Manufacturer - Arnold & Son
Collection - Time Pyramid
Model - Black
Name - 1TPAS.S01A.C124B
Year -
Reference -
Gender - Men's Watch / Unisex
Shape - Round
Style - Haute Horlogerie

CALIBRE

Movement - Manual Winding
Calibre - A&S1615
Power Reserve - 90 Hours
Frequency - 21,600 vph (3 Hz)
Jewels - 27
Individual Parts -

CASE

Diameter (w) - 44,6 mm
Material - Black Dlc Coated Stainless Steel
Bezel - Black Dlc Coated Stainless Steel
Winding Crown - Black Dlc Coated Stainless Steel
Water Resistance - 3 ATM / 30 M / 3 BAR
Crystal - Scratch Resistant Sapphire
Back : See-Though Sapphire Crystal

DIAL

Dial Material - Sapphire Crystal
Dial Colour - Transparent
Dial Numerals - Roman
Hands - Steel / Super-Luminova

BRACELET / STRAP

Bracelet Material - Alligator Leather
Bracelet Color - Black
Clasp - Buckle
Clasp Material - Black Dlc Stainless Steel

COMPLICATIONS

- Hour
- Minutes
- Seconds Indicator
- Double Power Reserve
-

OTHERS

- Skeletonized
- Power Reserve Display

CATALOGUE ESSAY

The A&S1615 movement with unique skeletonised pyramid-shaped architecture, was conceived, designed and developed in-house. The movement A&S1615 seemingly floats between two sapphire crystals, the Time Pyramid is a masterful rendition of technical prowess and unparalleled elegance. This superbly engineered wristwatch is part of the brand's Instrument Collection that combines instrument precision with classical styling. Inspired by the regulators created by John and Roger Arnold over two hundred years ago, and by antique British skeleton clocks, the new Arnold & Son Time Pyramid offers a highly cohesive and seductive blend of watchmaking feats that includes regulator, skeleton, vertical linear movement, pyramid-placement of components and multi-dimensional depth. The skeletonised calibre A&S1615 follows the original regulators from the brand with its component positioning and detailed 3D visual appeal. Movement parts and watch indications are built on three levels, with the subsidiary seconds dial on the bottom, the hour indications on a sapphire crystal dial in the middle level, and a silver top ring for the minutes indication. While the movement is extremely thin - at just 4.4 mm - the multiple levels bring amazing depth and detail to the watch. To further enhance the balance and symmetry of the Time Pyramid, the crown (with Arnold & Son's engraved logo) is artfully positioned at six o'clock. The gear train runs vertically in a linear format connecting the two barrels at six o'clock to the balance wheel at twelve o'clock, and endowing the movement with its pyramid structure. The bridges are designed so that all of the wheels, the two mainspring barrels, the escapement and balance wheel are all magnificently visible from the dial side.
