

# Arnold & Son Time Pyramid Stainless Steel For Sale

29,500 €

## TECHNICAL SPECIFICATIONS

Manufacturer	Arnold & Son
Collection	Time Pyramid
Model	Stainless Steel
Name	1TPAS.S01A.C124S
Registration Year	2021
Movement	Manual Winding
Limited Edition	One of Only Few Unit Produced
Case	Stainless Steel
Bracelet	Alligator Leather
Clasp	Stainless Steel

## GENERAL CHARACTERISTICS

Manufacturer - Arnold & Son  
Collection - Time Pyramid  
Model - Stainless Steel  
Name - 1TPAS.S01A.C124S  
Year -  
Reference -  
Gender - Men's Watch / Unisex  
Shape - Round  
Style - Haute Horlogerie

## CALIBRE

Movement - Manual Winding  
Calibre - A&S1615  
Power Reserve - 90 Hours  
Frequency - 21,600 vph (3 Hz)  
Jewels - 27  
Individual Parts -

## CASE

Diameter (w) - 44,6 mm  
Material - Stainless Steel  
Bezel - Stainless Steel  
Winding Crown - Stainless Steel  
Water Resistance - 3 ATM / 30 M / 3 BAR  
Crystal - Scratch Resistant Sapphire  
Back : See-Through Sapphire Crystal

## DIAL

Dial Material - Sapphire Crystal  
Dial Colour - Transparent  
Dial Numerals - Roman  
Hands - Steel / Super-Luminova

## BRACELET / STRAP

Bracelet Material - Alligator Leather  
Bracelet Color - Black  
Clasp - Buckle  
Clasp Material - Stainless Steel

## COMPLICATIONS

- Hour
- Minutes
- Seconds Indicator
- Double Power Reserve
- 

## OTHERS

- Skeletonized
- Power Reserve Display

## CATALOGUE ESSAY

The A&S1615 movement with unique skeletonised pyramid-shaped architecture, was conceived, designed and developed in-house. The movement A&S1615 seemingly floats between two sapphire crystals, the Time Pyramid is a masterful rendition of technical prowess and unparalleled elegance. This superbly engineered wristwatch is part of the brand's Instrument Collection that combines instrument precision with classical styling. Inspired by the regulators created by John and Roger Arnold over two hundred years ago, and by antique British skeleton clocks, the new Arnold & Son Time Pyramid offers a highly cohesive and seductive blend of watchmaking feats that includes regulator, skeleton, vertical linear movement, pyramid-placement of components and multi-dimensional depth. The skeletonised calibre A&S1615 follows the original regulators from the brand with its component positioning and detailed 3D visual appeal. Movement parts and watch indications are built on three levels, with the subsidiary seconds dial on the bottom, the hour indications on a sapphire crystal dial in the middle level, and a silver top ring for the minutes indication. While the movement is extremely thin - at just 4.4 mm - the multiple levels bring amazing depth and detail to the watch. To further enhance the balance and symmetry of the Time Pyramid, the crown (with Arnold & Son's engraved logo) is artfully positioned at six o'clock. The gear train runs vertically in a linear format connecting the two barrels at six o'clock to the balance wheel at twelve o'clock, and endowing the movement with its pyramid structure. The bridges are designed so that all of the wheels, the two mainspring barrels, the escapement and balance wheel are all magnificently visible from the dial side.
